

## Section 12: Federal Department Direct Awards & Spending. 10/30/09

The Federal Department Direct Awards & Spending column of the spreadsheet may be the most confusing funding category in this package. This column comprises awards to non-state recipients, direct spending by federal agencies, and discretionary awards to state agencies. These awards and expenditures represent all the ARRA funding to North Carolina that was not included in the state's original ARRA allocation. The purpose of this document is to show where these additional ARRA funds are going and how they are being spent.

Funding Type	Funding Amount	Number of Awards / Projects
Discretionary Awards to State Agencies	\$35,040,938	14
Direct Federal Expenditures	\$441,941,000	234
Awards to Non-State Recipients	\$302,405,848	240
<b>Total</b>	<b>\$779,387,786</b>	<b>488</b>

### Funding Types

**Discretionary Awards to State Agencies** represent awards to the state that were not part of North Carolina's original ARRA allocation. The N. C. Department of Public Instruction, for example, was awarded a \$509,000 competitive grant through the EPA's Clean Diesel Funding Assistance program.

**Direct Federal Expenditures** represent direct expenditures by federal agencies on ARRA projects in North Carolina. For example, over \$260 million dollars in ARRA spending has been designated by the Department of Defense for repairs and improvements on military bases in North Carolina, with another \$100+ million in Homeland Security, Army Corps of Engineers and Department of Veterans Affairs funding directed to federal projects within the state. Due to the location-based nature of this directed spending, counties such as Cumberland (home of Fort Bragg) and Hyde (the location of both Army Corps of Engineers and USDA projects) have larger totals than others.

**Awards to Non-State Recipients** includes direct grants from federal agencies to local governments, non-profit organizations, for-profit firms, private universities, community health centers, tribal governments, and education agencies. This list does not include the formula grants to local governments (e.g. CDBG-R grants to entitlement communities) that were included in North Carolina's original ARRA allocation.

### Sources

The OERI has used several sources for the information summarized here. Primarily, data has come from federal agency press releases, reports to Congress, information from recipient institutions and federal Web sites such as [www.USAspending.gov](http://www.USAspending.gov). The summary below is organized by county. To see the full list of all grants, please visit our Web site, [www.ncrecovery.gov](http://www.ncrecovery.gov).

## **Organization**

This document provides tables for each of the three funding types listed above. Due to the large number of awards to non-state recipients and direct federal expenditures, *Summary* tables for these two funding types are provided which aggregate all the award amounts and expenditures into ARRA programs or spending categories. Information on individual awards and expenditures can be found in the disaggregated *Detail* tables. Project-specific information was provided in the *Detail* tables whenever possible. Awards to non-state recipients and direct federal expenditures were also organized into *by County* tables to give legislators the most accurate information possible on ARRA activity in their district.
